

In the Claims

The status of claims in the case is as follows:

1 1. [Currently amended] Method for integrating forms
2 including fields defining the schema of a collaboration
3 space into said collaboration space, comprising the steps
4 of:

5 preparing at a browser using a legacy editor a form
6 containing fields defining said schema and hyperlinks
7 that point to web pages;

8 saving said form to local storage at said browser;
9 [[and]]

10 dragging and dropping said form from local storage into
11 an upload control panel in a user interface to said
12 collaboration space; and

13 parsing said form to identify said fields and
14 incorporate them into said schema.

1 2. [Original] The method of claim 1, said hyperlinks
2 providing access to files including text, graphics, images,
3 sound, and video files.

1 3. [Original] The method of claim 1, said web pages
2 residing on servers remote from the server for said
3 collaboration space.

1 4. [Original] The method of claim 2, further comprising
2 the steps of:

3 responsive to user selection of a said hyperlink,
4 downloading linked code; and

5 rendering said linked code into a display at said
6 browser.

1 5. [Original] The method of claim 1, said collaboration
2 space being implemented within an object model selectively
3 including place, room, folder, page, member, form, field,
4 placetype, roomtype, skin, and placebot objects.

1 6. [Original] The method of claim 5, with said room
2 object visible as a unique identifier in uniform resource
3 locators (urls).

1 7. [Original] The method of claim 5, further comprising
2 the step of using said field object to construct html
3 formatted input fields in forms.

1 8. [Original] The method of claim 5, further comprising
2 the step of defining said form object using said form
3 including imported hyperlinks.

1 9. [Original] The method of claim 1, further comprising
2 the steps of:

3 parsing said form, finding linked files and processing
4 uniform resource locators to generate a form object;
5 saving to a page object said form, said linked files,

6 and said form object; and

7 displaying at said browser said page with said form

8 object in read mode and said form in edit mode.

1 10. [Original] The method of claim 1, further comprising

2 the steps of:

3 responsive to creation of a valid link to an image

4 within an html page or skin, creating a uniform

5 resource locator (url) by:

6 downloading said images into a local directory in

7 the same folder as said html page or skin; and

8 uploading said linked and download images from said

9 local directory automatically when said page or skin is

10 uploaded.

1 11. [Currently amended] A method for incorporating a

2 hypertext markup language (html) form including fields

3 defining the schema of a collaboration space into a

LOT920000023US1

16

4 collaboration space place, comprising the steps of:

5 creating a form containing html fields defining said
6 schema in html separate from said place;

7 dragging and dropping said form into said place;

8 parsing said form to identify each html field and
9 process uniform resource locators and to incorporate
10 each said html field into said schema;

11 creating a field for each html tag; and

12 saving on a page said html in read mode and said form
13 in edit mode.

1 12. [Original] The method of claim 11, further comprising
2 the steps of:

3 downloading said html and linked images for loading to
4 client storage in its original form by

5
6 importing an original html file which contains an

LOT920000023US1

7 image tag and the related image files into
8 collaboration space;

9 parsing said original html file to find linked
10 images;

11 creating a modified html file by modifying said
12 image tag in said html file to refer to the copy
13 of the image file attached to document on the
14 server;

15 saving said original html file and said modified
16 html file on a collaboration space page object;
17 and

18 displaying said page object with said original
19 html file in edit mode and said modified html file
20 in read mode.

1 13. [Currently amended] Method for creating and uploading
2 a form including fields defining the schema of a
3 collaboration space into a place in collaboration space,
4 comprising the steps of:

5 using an hypertext markup language (html) editor,
6 prepare a document containing custom code as a manually
7 created html form including fields defining said
8 schema, with all said custom code within a body tag of
9 said document;

10 uploading said document to said place by dragging and
11 dropping said document to an upload control in a
12 browser user interface to said place;

13 parsing said form to identify said fields and
14 incorporate them into said schema; and

15 at said place, replacing head and title tags in said
16 document with place tags.

1 14. [Currently amended] System for creating and uploading
2 a form including fields defining the schema of a
3 collaboration space into a place in collaboration space,
4 comprising:

5 a hypertext markup language (html) editor for preparing
6 a document containing custom code as a manually created

7 html form including fields defining said schema with
8 all said custom code within a body tag of said
9 document;

10 a browser;

11 a window at said browser for providing a user interface
12 to said place, said user interface including an upload
13 control;

14 said upload control uploading said document to said
15 place upon said document being dragged and dropped into
16 said upload control;

17 said place parsing said form to identify said fields
18 and incorporate them into said schema.

1 15. [Currently amended] A system for integrating forms
2 including fields defining the schema of a collaboration
3 space into collaboration space, comprising:

4 a client browser;

5 a legacy editor for preparing a form containing
6 hyperlinks that point to web pages and fields defining
7 said schema;

8 a local storage for saving said form at said browser;
9 and

10 an upload control panel receiving said form from said
11 local storage and uploading said form to said
12 collaboration space;

13 said collaboration space including a server for parsing
14 said form to identify said fields and incorporate them
15 into said schema.

1 16. [Currently amended] A program storage device readable
2 by a machine, tangibly embodying a program of instructions
3 executable by a machine to perform method steps for
4 integrating forms including fields defining the schema of a
5 collaboration space into collaboration space, said method
6 steps comprising:

7 preparing at a browser using a legacy editor a form

8 containing hyperlinks that point to web pages and
9 fields defining said schema;

10 saving said form to local storage at said browser;
11 [[and]]

12 dragging and dropping said form from local storage into
13 an upload control panel in a user interface to said
14 collaboration space; and

15 parsing said form to identify said fields and
16 incorporate them into said schema.

1 17. [Currently amended] A program storage device readable
2 by a machine, tangibly embodying a program of instructions
3 executable by a machine to perform method steps for
4 incorporating a hypertext markup language (html) form
5 including fields defining the schema of a collaboration
6 space into a collaboration space place, said method steps
7 comprising:

8 creating a form including fields defining said schema
9 in html separate from said place;

10 dragging and dropping said form into said place;
11 parsing said form to identify each html field and
12 process uniform resource locators and to incorporate
13 each said html field into said schema;
14 creating a field for each html tag; and
15 saving on a page said html in read mode and said form
16 in edit mode.

1 18. [Currently amended] A computer program product or
2 ~~computer program element~~ for incorporating a hypertext
3 markup language (html) form including fields defining the
4 schema of a collaboration space into a collaboration space
5 place [[by]], comprising:
6 a computer readable medium;
7 first program instructions for creating a form in html
8 separate from said place and including fields defining
9 said schema;

10 second program instructions for dragging and dropping
11 said form into said place;

12 third program instructions for parsing said form to
13 identify each html field and process uniform resource
14 locators and to incorporate each said html field into
15 said schema;

16 fourth program instructions for creating a field for
17 each html tag; and

18 fifth program instructions for saving on a page said
19 html in read mode and said form in edit mode; and
20 wherein

21 said first, second, third, fourth, and fifth program
22 instructions are recorded on said computer readable
23 medium.

1 19. [Currently amended] A computer program product for
2 integrating forms including fields defining the schema of a
3 collaboration space into said collaboration space according
4 to steps comprising:
